To Whom It May Concern

UK & EU REACH

In accordance to article 33 of the REACH regulations, any supplier of an article containing a substance on the candidate list in a concentration above 0.1% (w/w) shall provide the recipient with sufficient information to allow safe use of the article, including as a minimum, the name of that substance.

Following review of the 5 new chemicals added to the SVHC list, please be advised that one of the newly added chemicals **2-(2H-benzotriazol-2-yl)-4-(1,1,3,3-tetramethylbutyl)phenol (CAS#: 3147-75-9- EC: 221-573-5)** is present at a level of ≥ 0.1 weight % in our K85000 Series Polyurethane only.

Please note that the addition of a substance to the SVHC List does not place any marketing restrictions on products containing this substance. **The above Polyurethane series at this present time remains 100% REACH-compliant.**

We are working with our suppliers on alternative chemical that does not contain any chemicals listed on the SVHC List.

We do not intentionally introduce any other substances that are listed on the REACH Candidate List of Substances of Very High Concern (SVHC) into other products and raw materials used within our range.

Please do not hesitate to contact us if you require further information.
